### **RESEARCH STATEMENT**

The overall goal of this research is to understand how the visual thalamus and cortex interact to construct our perceptual world.

The first project explores the unconventional proposal that the primary sensory information received by the visual cortex from the visual thalamus [e.g., the lateral geniculate nucleus (LGN)] is not purely visual but rather visual information, primed by inputs from other sensory modalities. In this project, we hypothesize that the primate brain achieves fast and accurate decision-making in part due to its ability to focus, right from the beginning, on relevant aspects of inputs from all sense organs without appreciating all the details presented by each sense organ. Our specific hypothesis is that auditory and visual information are combined in a task dependent manner in the visual thalamus before this message is processed in cortex.

In a second project, we test the hypothesis that all thalamic nuclei contain some cell groups that act as drivers (send the main message) and some that act as modulators for multiple cortical areas, thus mediating the generation of an array of diverse cortical functions. The thalamus is not simply a passive relay to cortex. Instead, just as primary visual cortex (V1) depends on LGN, the secondary visual area (V2) and the middle temporal visual area (MT) depend on a combination of dedicated pathways through the thalamus (e.g., pulvinar) and direct feed forward connections from V1. This arrangement allows new properties to emerge at both the thalamic and cortical levels through dynamic loops.

A third project focuses on communication between cells in different areas of visual cortex and

*Curriculum Vitae*  
*Vivien A. Casagrande*  
03/22/2016

examines how visual messages are coded and transmitted from lower to higher visual areas and what the role of feedback is in this process.

We use a variety of electrophysiological, anatomical, and imaging approaches to address these questions including single unit and multielectrode recording in both anesthetized and awake behaving primates, light, electron microscopic and confocal examination of cells and circuits, optical imaging of intrinsic signals and pharmacological manipulation.

Our laboratory also has had a long standing interest in the evolution of the visual system. Therefore, we continue to use a comparative approach to examine for similarities and differences in the organization of the visual system in a variety of primate species.

### **EDUCATION**

- |      |  |
|------|--|
| 1964 | B.A. University of Colorado (Psychology, major; Biology, minor)            |
| 1973 | Ph.D. Duke University Physiological Psychology; Sponsor: Dr. I. T. Diamond |

### **POSITIONS AND FELLOWSHIPS**

- |              |   |
|--------------|---|
| 1965-1967    | Research Assistant, Arthur D. Little, Inc., Cambridge, Massachusetts  |
| 1967-1968    | United States Public Health Service Traineeship in Physiological Psychology, Duke University (sponsor: Dr. I. T. Diamond)       |
| 1968-1970    | United States Public Health Service Fellowship, Duke University   |
| 1970-1972    | United States Public Health Service Fellowship, Duke University   |
| 1972-1973    | National Institutes of Health, NIGMS, Behavioral Medicine, Postdoctoral Fellowship, Duke University                             |
| 1973-1975    | Research Associate, Department of Anatomy, University of Wisconsin (Postdoctoral Supervisor: Dr. R.W. Guillery)                 |
| 1975-1980    | Assistant Professor, Departments of Anatomy (primary appointment) and Psychology (secondary appointment), Vanderbilt University |
| 1980-present | Senior Fellow and Investigator, John F. Kennedy Center for Research on Human Development, Peabody College                       |
| 1980-1986    | Associate Professor, Departments of Cell Biology (formerly Anatomy) and Psychology, Vanderbilt University                       |
| 1986-present | Professor, Departments of Cell & Developmental Biology (formerly Cell Biology) and Psychology, Vanderbilt University            |

*Curriculum Vitae*  
*Vivien A. Casagrande*  
03/22/2016

1988-1992 Co-Director for Biomedical Sciences, Kennedy Center for Mental Retardation

1997-present Professor, Department of Ophthalmology and Visual Sciences (secondary appointment), Vanderbilt Medical School

### **ACADEMIC HONORS AND AWARDS**

1967-1968; 1970-72	NIH Predoctoral Traineeships
1972-1973	NIH NRSA Postdoctoral Fellowship
1977-1980	Academic Investigator Salary Award
1981	The Charles Judson Herrick Award for meritorious contributions to comparative neurology, presented by the American Association of Anatomists
1981-1986	Research Career Development Award
1998	President, Cajal Club
2006	Fellow, American Association for the Advancement of Science
2011	Fellow of the American Association of Anatomists
2012	Charles R. Park Award for Basic Research Revealing Insights into Physiology and Pathophysiology, 2012
2013	Chancellor's Award for Research

### **TEACHING EXPERIENCE**

Introductory Psychology (Graduate Assistant), Duke University

Mechanisms of Visual Perception (Tutorial), Duke University

Central Nervous System (Teaching Assistant), University of Wisconsin  
The Nervous System, Vanderbilt University (Lecturer)

Animal Behavior, Vanderbilt University (Course Director)

Freshman Seminar: Neural Development

Special Topics in Neuroscience, Vanderbilt University (Course Director)

Topics have included: Development of the Nervous System; Structure and Function of Dendrites; Structure and Function of the Vertebrate Eye; Limbic System; History of Neuroscience; Development of the Visual System; Structure and Function of the Tectum; Methods in Neuroscience; Parallel Processing in the Visual System; The Role of Neural Activity in Neural Development; Current issues in Neural Development; Current Methods in Neurobiology; Designing Good Experiments in Neurobiology, Imaging Methods: Cells to Brains

Basic Course in Department of Ophthalmology, Vanderbilt University (Guest Lecturer)

*Curriculum Vitae*  
*Vivien A. Casagrande*  
03/22/2016

Neuroanatomy, Meharry Medical College (Guest Lecturer)

Seminar on Brain Imaging - Department of Psychiatry, Vanderbilt University (Guest Lecturer)

Cell Biology - Department of Cell Biology, Vanderbilt University

Neural Development - Department of Psychology, Vanderbilt University

The Visual System - Cross Departmental Course, Vanderbilt University (Lecturer)

Cell and Molecular Neuroscience - Department of Cell Biology, Vanderbilt University (Course Director)

Cellular and Integrative Neuroscience - Departments of Cell Biology, Pharmacology, Physiology and Biophysics, and Center for Neuroscience, Vanderbilt University (Course Director)

Interdisciplinary Graduate Course - Vanderbilt Medical School (Lecturer)

Fundamentals of Neuroscience - Vanderbilt Medical School (Lecturer)

Special Topics in Cell and Developmental Biology - Vanderbilt Medical School (Lecturer)

Systems Neuroscience (NURO 340) (Course Director)

### **ADMINISTRATION AND COMMITTEES: NATIONAL & INTERNATIONAL**

National Institutes of Mental Health Fellowship Review Committee, 1975-1977

National Institutes of Health Bio-Psychology Study Section, 1979-1983

National Institutes of Health Behavioral and Neurosciences Fellowship Ad Hoc Review Group, 1979-1983

National Science Foundation, Outside Reviewer

National Eye Institute, Visual Sciences A Study Section, Ad Hoc Reviewer

National Eye Institute, Visual Sciences B Study Section, Ad Hoc Reviewer

Panel for Presidential Young Investigator Awards (NSF), Member, 1989

Association for Research in Vision and Ophthalmology, Program Planning Committee, 1989-present; Chairman, Anatomy and Pathology Subsection, 1990-1991

Selection Committee for 1991 Society for Neuroscience, Young Investigator Award

Invited Organizer of American Association of Anatomists Cajal Club Symposium, 1992: The

Role of Glia in Neural Pattern Formation

Association for Research in Vision and Ophthalmology, Strategic Planning Committee,  
1991-1992 (chair, 1992)

Mini-Symposium organizer for the Association for Research in Vision and Ophthalmology  
1992: A new look at parallel vision channels in primates

C.J. Herrick Award Committee, 1993-1996

Cajal Club Nomination Committee for President and Program Chair, 1992-1994

University of Kansas MRRC Outsider Reviewer - Neuroscience Cores, 1993

National Eye Institute Visual Sciences B Study Section, 1995-1998

Ad Hoc reviewer, National Science Foundation 1976-present

Cajal Club President Elect (Nissl Body) 1997; President (Nucleolus) 1998

Dissertation Committee for D. A. Barker, University of Sydney, (Australia) 1998

NSF/EPSCoR External Advisory Committee 1996-2000

Ad Hoc grant reviewer, Wellcome Trust (1999, 2000, 2002)

Society for Neuroscience Communications and Chapters Committee, 1997-2001

Board Member, Cajal Club Foundation Corporation, 1997-present

University of Sydney AU thesis committee (Andrew White)

Chairperson, National Eye Institute CDA Review Panel, 2006

Medical Research Council (MRC) review (UK) 2007

Editorial Consultant for: *Science*, *J. Comparative and Physiological Psychology*, *Physiology & Behavior*, *Neuroscience*, *Journal of Neuroscience*, *J. Neurophysiology*, *Vision Research*, *Developmental Brain Research*, *Brain Research Bulletin*, *Brain Research*, *Behavioral and Brain Science*, *Laboratory Animal Science*, *Brain Behavior and Evolution*, *Journal of Medical Primatology*, *Investigative Ophthalmology and Visual Science*, *Psychological Bulletin*, *Current Eye Research*, *Visual Neuroscience*, *Cerebral Cortex*, *Physiology and Behavior*; *Laboratory Animal Science*, *Anatomical Record*, *Trends in Neurosciences*, *Proceedings for the National Academy of Sciences*, *Experimental Brain Research*, *Nature*, *J. 03/22/2016

- 2005 Vision Sciences Society Convention: *Evolution of visual pathways* (Sarasota, FL)  
(Invited symposium talk; proceedings published in *Journal of Vision* 5(12) 32a)
- 2005 Fourth Asian Pacific International Congress of Anatomists (APICA) (Kusadasi, Turkey):  
*The language of vision: pathways, maps and modules* (also chaired one session)
- 2005 Colloquium staged by the Department of Physiological Optics at the University of  
Alabama-Birmingham: *Geniculostriate pathways*
- 2005 VSRC Visiting Scholars Program, University of Alabama-Birmingham: *Functional  
organization of primate visual cortex revealed by imaging of intrinsic signals*
- 2005 Summer Neuroscience Apprenticeship Program (SNAP), Vanderbilt University  
(Nashville, TN): *Neuroimaging: a window into the working brain* (invited talk)
- 2006 Optical Society of America (Tuscon, AZ): *Evolution of visual pathways*
- 2006 Krasnow Institute at George Mason University (Fairfax, VA): *The geometry of feature  
maps in primate striate and extrastriate cortex: what optical imaging reveals about  
connections and function* (invited talk)
- 2006 Winter Conference on Brain Research (Steamboat Springs, CO): *The obsolete cortical  
module: setting boundaries on the problem* (invited panel speaker)
- 2006 Frontiers in Neuroimaging Program, University of Alabama (Birmingham AL): *A different  
slant on orientation bias and perception revealed by optical imaging of intrinsic signals*  
(invited panel speaker)
- 2006 Colloquium: The Vanderbilt Vision Research Center and Department of Ophthalmology  
& Visual Sciences, Vanderbilt University (Nashville, TN): *New perspectives on the  
evolution of the visual system*
- 2006 Neuroscience Seminar: Department of Psychology, Vanderbilt University (Nashville,  
TN): *New perspectives on the evolution of the visual system*
- 2006 Seminar: Department of Cell & Developmental Biology, Vanderbilt Medical School  
(Nashville, TN): *The language of Vision, Pathways, Maps and Modules: How Does it All  
Work Together?*
- 2007 Seminar Class MARC PROGRAM: Physiology University of the Virgin Islands (St Thomas,  
United States, Virgin Islands): *How we see: links between brain mechanisms and  
perception*

**SPONSORED STUDENTS**

Sherre (Florence) Phillips (1979 - 1985, graduate student) (Ph.D. 1985, Vanderbilt University),  
Research Associate Professor, Department of Psychology, Vanderbilt University.

Edward DeBruyn (1977 - 1983, Anatomy graduate student) (Ph.D. 1983, Vanderbilt  
University), currently Research Assistant Professor, Biomedical Engineering, Vanderbilt  
School of Engineering.

*Curriculum Vitae*  
*Vivien A. Casagrande*  
03/22/2016

- Jean Graham (1977 - 1979, postdoctoral fellow) (Ph.D. 1977, Washington University), currently Research Associate Professor, Department of Anatomy, University of Washington.
- Eric Haseltine (1978 - 1979, postdoctoral fellow) (Ph.D. 1978, University of Indiana), currently Associate Director of National Intelligence for Science and Technology, Office of the Director of National Intelligence.
- Judy Brunso-Bechtold (1979 - 1981, postdoctoral fellow; 1981-1983, research assistant) (Ph.D. 1977, Florida State University), currently Professor, Department of Neurobiology & Anatomy, Wake Forest University School of Medicine.
- Heywood Petry (1980 - 1982, postdoctoral fellow) (Ph.D. 1981, Brown University), currently Professor, Department of Psychological & Brain Sciences and Professor, Ophthalmology & Visual, University of Louisville, Louisville, Kentucky.
- Michael Sesma (1981 - 1983, postdoctoral fellow) (Ph.D. 1981, University of California-Riverside), Assistant Professor, School of Optometry, University of Missouri. 1983-1987; currently Chief, Research Scientist Development Program, Office for Special Populations, National Institute of Mental Health/National Institutes of Health, and Vice President of the Gaithersburg, Maryland City Council.
- Michael Conley (1984 - 1985, postdoctoral fellow) (Ph.D. 1983, Duke University), currently Research Assistant Professor, Department of Psychology, Duke University.
- George Condo (1984 - 1988, postdoctoral fellow) (Ph.D. 1984, University of California-Riverside). Research Assistant Professor, Department of Cell Biology, Vanderbilt University 1988-1990; currently Associate Professor, Bowdoin College.
- Edward Lachica (1985 - 1990, graduate student, Ph.D., Psychology, 1990) NIH postdoctoral fellow with Dr. Edwin Rubel, University of Washington, Seattle, Washington; currently Director of Digital Imaging and Image Analysis, Meridian Instruments.
- James Hutchins (1985 - 1987, postdoctoral fellow) (Ph.D. 1985, Baylor College of Medicine), Research Assistant Professor, Department of Cell Biology, Vanderbilt Medical School 1987-1989; currently Professor of Health Sciences, Assistant Professor of Neurology (Research) and Ophthalmology, and Assistant Vice Chancellor for Faculty Development, University of Mississippi.
- Alfonso Claps, M.D., Ph.D. (1989 - 1991, postdoctoral fellow) (Ph.D. 1988, Catholic University of Chile; M.D. 1982, University of Chile); currently Professor, Catholic University of Chile.
- John Kelly Johnson, Ph.D. (1990 - 1993, postdoctoral fellow) (Ph.D. 1987, University of Kansas: NEI postdoctoral fellow, Syracuse University, Syracuse, N.Y., 1987-1990); currently Instructor, Division of Biological Sciences, University of Kansas.
- John D. Allison, Ph.D. (1992 - 1996, postdoctoral fellow) (Ph.D. 1992, University of Texas,

*Curriculum Vitae*  
*Vivien A. Casagrande*  
03/22/2016

Austin, Texas); currently Research Assistant Professor, Department of Electrical Engineering, Vanderbilt University.

Yuchuan Ding, M.D., Ph.D. (1994 - 1998, postdoctoral fellow) (M.D. 1983, Beijing Medical College, Beijing China; Ph.D. 1994, Australian National University); currently Associate Professor, Department of Neurological Surgery Wayne State University School of Medicine

Jamie Boyd, Ph.D. (1995 - 1999, postdoctoral fellow) (Ph.D. 1995, Department of Ophthalmology, University of British Columbia, Vancouver, BC, Canada); currently Postdoctoral Fellow, Department of Biological Sciences, Simon Fraser University.

Amy (Wiencken) Wiencken-Barger (1995 - 2001, graduate student; Department of Cell Biology, Vanderbilt Medical School); currently research fellow in the Department of Pharmacology, School of Medicine, University of North Carolina at Chapel Hill.

Jennifer Ichida (1996 - 2002, graduate student) Department of Psychology, Vanderbilt University; currently Research Assistant Professor, Department of Ophthalmology and Visual Science, Moran Eye Center, University of Utah.

Xiangmin Xu (1998 - 2004, graduate student) (Ph.D. 2004, Vanderbilt University), Department of Psychology, Vanderbilt University; currently Associate Professor, Department of Anatomy & Neurobiology, University of California, Irvine.

Zhuang Song (1999 - 2001, graduate student), Department of Psychology, Vanderbilt University); currently postdoc, University of California, San Diego.

Yuri Shostak, Ph.D. (Ph.D. 1992, Institute of Radiobiology of the National Academy of Sciences of Belarus; Minsk, Belarus). (1999 - 2002, post-doctoral fellow) Department of Cell Biology, Vanderbilt University; currently Director, Tiggroup.

Gyula Sáry, M.D. Ph.D. (M.D. 1985, Albert Szent-Gyorgyi Medical University; Szeged, Hungary, [now University of Szeged] Ph.D. 1996, currently Professor, University of Szeged). (2000 - 2002, post-doctoral fellow; summers 2003 - 2006, 2009, visiting scholar), Department of Cell Biology, Vanderbilt University; currently Chair, Dept. Physiology, University of Szeged, Hungary.

David Royal (2000 - 2006, graduate student), Neuroscience Program: Molecular Neuroscience track, Vanderbilt Medical School; currently LTJG, Health Care Administrator, Medical Service Corps, United States Navy Reserves.

Maria Couppis (2003 - 2004, graduate student), Neuroscience Program, Vanderbilt Medical School; currently postdoctoral fellow at the University of Colorado Health and Sciences Center.

Ilya Khaytin (2003 - 2008, graduate student), MSTP Program, Vanderbilt Medical School; currently Resident, Wake Forest.
